

**Assembly
Tips:**

Print on heavy paper.

A ruler helps hold the paper down and maintains a straight edge while pre-folding (before cutting or gluing).

After pre-folding and cutting, apply craft paste or glue-stick to the back of both scare crows, and in the gray area at the base of the left scare crow.

Make sure the green base of the scare crow (on the right) overlaps the glued gray area of the scare crow on the left) when gluing the two together.

Fold lines
